## Fall Dress Fabrics

In fact quite the best in the city. Some two thousand dollars worth just opened up. Most any color, most any weave you could desire for early fall Suits, Skirts, etc.

These Blue Serges are especially pretty in quality and of course priced reasonable

50c to \$2.00 yd.

Other Fabrics 50c to \$3.00 yard.

## New Fall Silks

In a variety of new patterns

Up to \$1.50 yd.

If it's new, it's here.

Moore-Wilson Co  
THE DAYLIGHT STORE.

## ASBESTOS SHIPMENT HAS BEEN RECEIVED

MR. FARMER RECEIVED 500 POUNDS BY EXPRESS WEDNESDAY

## MAKING CHANGES

Manufacture of Asbestos Yarn Necessitates Changing of Some of the Machinery.

Mr. Albert S. Farmer has received his first shipment of asbestos which will be used in making asbestos yarn at the Conners Mill, having received 500 pounds by express Wednesday. Mr. Farmer states that he will receive a ton within the next few days and after that will receive the material in car load lots.

These first shipments are to be used in practice. The making of asbestos yarn is something new to the forces employed here and of course a few experiments will have to be made first.

For the past few days Mr. Farmer has been busy having the machinery in the mill changed. Although there will be several addition in the way of machinery, for the most part there will be changes. One of the main changes will be that of the card wire. The former ones used in the manufacture of ordinary yarn are not suited to spinning out the asbestos fibre and therefore new ones will be put in.

The crude asbestos is being shipped here from the Thedford Mines in the province of Quebec, Canada. It is unlike any found in this country and is of a very fine quality. It comes in small blocks and has the appearance of stone and is almost as heavy as the ordinary flint rock. When crushed this asbestos makes an extremely fine fibre. When one of the fibres is put under a microscope it is seen that it has a perfectly smooth and glassy surface. It is so smooth in fact that the fibre has to be treated with a chemical in order to make the little strands rough enough to hold together when they are being made into yarn.

Mr. Farmer expects to have everything ready to start the manufacture of the asbestos yarn within the next few weeks. He already has a contract for enough orders to warrant the running of the machinery for six months. The yarn is strictly a war product but orders already placed warrants Mr. Farmer in making the change in the machinery.

It is not known yet just exactly what use the yarn is to be put to, but it is thought that it will be used to wrap the exterior of the chambers of rapid firing guns. When the chambers get hot, they can be removed and another put it, in this way allowing the guns to be of much more service.

## COMMUNITY WORK AT WILLIAMSTON MILLS

Bungalow is Being Made Ready for Library—Miss Garlington Will be in Charge.

Mr. W. M. Sherard, superintendent of the Williamston mills was a business visitor to the city yesterday and was asked about the community work to be done in the mill village there.

Mr. Sherard stated that at present a force of hands are employed in fixing up one of the cottages into a modern bungalow. A partition is being put in and the building changed to suit the use it will be put to. Around the bungalow there will be a 10 foot porch, providing ample rooms for the mill operatives to rest during their spare hours.

The bungalow will be equipped as a library and will have a number of books and periodicals, as well as newspapers.

Miss Maggie Garlington is to be in charge of the work and there will be given as follows:

Cooking and home sanitation.  
Year 'round garden.  
Night school for six months in the year, two nights in the week.  
Mothers' club.  
Story telling hour for children.  
Tooth brush campaign.  
Playground activities.

These are in accordance with the extension policies of Winthrop College.

## WEATHER FORECAST.

The following is the weekly weather and crop summary as sent out by the United States Department of Agriculture as sent out for the South Carolina section from Columbia:

The recent rains have been followed by market general improvement in crops. However, the ground is still too dry in portions of the Piedmont and too wet locally on the coastal plain. The showers were generally too late for the early corn crop, which is practically made; but late corn has been greatly benefited. Cotton shows new growth, but there is complaint of shedding in sections where there has been too much or too little rain. Forage peas show good to excellent stands, according to amounts of rainfall. Small grains thrashing shows continued good results. Winter track planting has begun on the lower coastal plain. Fruits and vegetables are plentiful, notwithstanding the bad effects of the recent dry weather. There is some complaint of pear blight.

## MR. G. T. WILLIAMS WILL BE IN THE RACE

SAYS HE WILL BE CANDIDATE FOR SUPT. OF EDUCATION

## ANDERSON MAN

Was Born and Reared in This County and is Graduate of Cedar Springs Institute.

Mr. G. T. Williams informs The Intelligencer that he will be a candidate for the office of superintendent of education for Anderson county in the primary next summer. This action, he states, is made after being asked to do so by friends in and out of the city, and after due deliberation on his part.

Mr. Williams is a native of Anderson county and has spent most of his life in school. After going to the public schools for a few years, he found it necessary to attend the school at Cedar Springs which is wholly devoted to the education of the blind. Mr. Williams is blind and is a graduate of the Cedar Springs Institution.

Mr. Williams states that he has thought of trying for the office of superintendent of education for many years and has become familiar with it through heavy reading. He also states that he appreciates the fact that he is a young man, but is confident that there will be no trouble in giving the very best results if elected to the place.

Mr. Williams is 25 years of age, has attended school 12 years and his life has been given to educational matters. He says that he feels that educational matters is his calling.

He states that there is a common opinion among the people that a blind man cannot fill such positions as he aspires to because he is not able to see. He states that he can use a stenographer and that he can dictate his work as well as anyone else. He can also sign his name, so there would be no trouble along this line should he be elected.

## LONG SEWER LINE FINISHED YESTERDAY

Forces Now Busy Putting in Short Extensions—Begin Grading on South Main Soon.

Yesterday at noon the city forces completed the extension of the sewerage system from a point on East Orr street, near the lower Brissett lumber yard, to Marshall avenue, to Calhoun street and down Calhoun street to Evans street. This extension is about 1,600 linear feet and will serve a goodly number of houses.

After the completion of the job yesterday, Mr. Gilmer, street overseer reduced his forces to 18 men. He and a small force of men have started the putting down short sewer lines extending out a few feet from the street paying at street intersections, thus doing away with the necessity of cutting into the paving later when further extensions of the system will have to be made.

The plumbers will get to work on South Main street on Monday and as soon as they finish with the pipes the grading of this street preparatory to the paving will begin.

## LIGHTNING KILLED GIRL.

Bolt Was Fatal on Monday Afternoon At Lowndesville.

News has reached the city of the death of the little six year old daughter of Mr. Joe Hill, a prominent farmer east of Lowndesville, which was caused by a bolt of lightning on Monday afternoon.

The little girl and her school teacher, Miss Annie Bell were going home from school and the lightning struck a tree near them. Miss Bell was carrying an umbrella and it is supposed that this caused the lightning to jump from the tree to the little girl. Miss Bell was badly shocked and burned, but will recover.

## FUNERAL YESTERDAY.

Interment Will Be Made This Morning In Greenville.

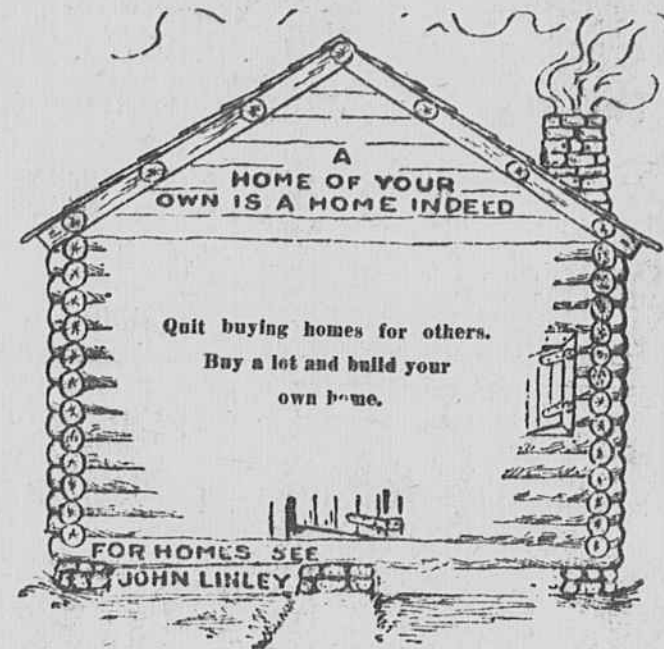

The funeral services of John P. Hillhouse, who was killed at the substitution of the Southern Public Utilities company Wednesday morning, were held yesterday afternoon at 6 o'clock at the residence on Elizabeth street, conducted by the Rev. D. Witherspoon Dodge, pastor of Central Presbyterian church.

The remains will be taken to Greenville this morning on the 8:30 car and interment will be made in the city cemetery there. Six of Mr. Hillhouse's fellow-workers will act as pall bearers: A. E. Holmes, W. D. Gray, C. H. Burkett, Jr., B. F. Elrod, C. M. McCue and C. M. Shorard.

## DEATH OF MRS. HAMMETT.

Wife of Baptist Minister Died at Williamston—Buried in Greenville.

Mrs. W. B. Hammett, wife of the Rev. W. B. Hammett, pastor of the Flat Rock Baptist church, died in Williamston on Tuesday, and her body was carried to Greenville for interment on Wednesday. Mrs. Hammett lived in Greenville at the Brandon Mills before moving to Williamston, where she and Mr. Hammett had been living for about a year.

## Figures of Interest to You

Here is a table showing what you ARE doing and what you MIGHT do if you would only make up your mind to DO it.

Find the column that fits your case and then show it to your wife; you will both decide that SOMETHING should be done.

Don't pay rent always; start NOW by buying a lot in NORTH ANDERSON. You won't pay for it probably in one or two years, but eventually the lot will be yours.

This table shows how much a certain sum, paid for rent, amounts to in a period of from 10 to 25 years, with interest at 6 per cent per annum, compounded annually.

Rent Pr. Mo.	10 Years	15 Years	20 Years	25 Years
\$10	\$1,581.68	\$2,793.10	\$4,414.26	\$6,583.72
12	1,898.02	3,351.71	5,297.11	7,900.46
15	2,372.52	4,189.64	6,621.39	9,875.57
18	2,847.03	5,027.57	7,945.67	11,850.67
20	3,163.36	5,556.19	8,528.52	13,167.28
25	3,964.20	6,982.73	11,035.65	16,457.28

Think of the money you are actually wasting, throwing away, depriving your family of by paying rent; you are paying nearly DOUBLE what you ought to pay. LOOK at the table AGAIN.

We sell lots in NORTH ANDERSON for \$10. down and \$10. a month; and remember our "Profit Sharing" proposition makes it well worth your while to buy during AUGUST, thereby securing a greater portion of the profits than if you waited until later to buy.

# TAKE SALTS FOR THE KIDNEYS IF YOUR BACK HURTS

We Should Drink Lots of Water and Eat Less Meat, Says Noted Authority on Kidney Disorders

Recommends a Spoonful of Jad Salts In Glass of Water Before Breakfast to Stimulate Kidneys and Eliminate the Uric Acid

Uric acid in meat excites the kidneys, they become overworked, get sluggish, ache, and feel like lumps of lead. The urine becomes cloudy, the bladder is irritated, and you may be obliged to seek relief two or three times during the night. When the kidneys clog you must help them flush off the body's urinous waste or you'll be a real sick person shortly. At first you feel a dull misery in the kidney region, you suffer from backache, sick headache, dizziness, stomach gets sour, tongue coated and you feel rheumatic twinges when the weather is bad.

• Eat less meat, drink lots of water; also get from any pharmacist four ounces of Jad Salts; take a tablespoonful in a glass of water before

breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean clogged kidneys and stimulate them to normal activity, also to neutralize the acids in urine, so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive, cannot injure, makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active. Druggists here say they sell lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.
